

Errata: *Essential Skills, 13th Edition*

The Cambridge Victory publications involve the collaborative effort of skilled test preparation writers, experienced educators, and trained editors to produce a product that effectively prepares students for test day. We work hard to create accurate, error-free materials, but occasionally we make mistakes. Please see the corrections below and notify your students of these changes when you present this item in class:

46. Which choice is supported by the information given in the graph(s)?

- F. NO CHANGE
- G. less than four times
- H. more than four times**
- J. DELETE the underlined portion

46. (H) ORG 20-27

According to the right-hand graph, by the time the project was completed in 1991 (having reached the planned 42,500 miles), the total cost was approximately \$130 billion (the federal portion of which was about \$115 billion). The Highway Act allocated \$25 billion federal dollars to the system. When it had reached 42,500 miles in 1991, the federal share of the cost was approximately \$115 billion dollars. This is more than four times the original expected cost, (H).
